The Skull of Australopithecus afarensis (Series in Human Evolution) William H. Kimbel, Yoel Rak, Donald C. Johanson

The book is the most in-depth account of the fossil skull anatomy and evolutionary significance of the 3.6-3.0 million year old early human species *Australopithecus afarensis*. Knowledge of this species is pivotal to understanding early human evolution, because 1) the sample of fossil remains of *A. afarensis* is among the most extensive for any early human species, and the majority of remains are of taxonomically informative skulls and teeth; 2) the wealth of material makes *A. afarensis* an indispensable point of reference for the interpretation of other fossil discoveries; 3) the species occupies a time period that is the focus of current research to determine when, where, and why the human lineage first diversified into separate contemporaneous lines of descent. Upon publication of this book, this species will be among the most thoroughly documented extinct ancestors of humankind. The main focus of the book - its organizing principle - is the first complete skull of *A. afarensis* (specimen number A.L. 444-2) at the Hadar site, Ethiopia, the home of the remarkably complete 3.18 million year old skeleton known as "Lucy," found at Hadar by third author D. Johanson in 1974. Lucy and other fossils from Hadar, together with those from the site of Laetoli in Tanzania, were controversially attributed to the then brand new species *A. afarensis* by Johanson, T. White and Y. Coppens in 1978. However, a complete skull, which would have quickly resolved much of the early debate over the species, proved elusive until second author Y. Rak's discovery of the 444 skull in 1992. The book details the comparative anatomy of the new skull (and the cast of its brain, analyzed by R. Holloway and M. Huan) , as well as of other skull and dental finds recovered during the latest, ongoing field work at Hadar, and analyzes the evolutionary significance of *A. afarensis* in the context of other critically important discoveries of earliest humans made in recent years. In essence, it summarizes the state of knowledge about one of the central subjects of current paleoanthropological investigation.

From reader reviews:

Mary Russell:

Information is provisions for individuals to get better life, information nowadays can get by anyone with everywhere. The information can be a expertise or any news even a huge concern. What people must be consider when those information which is inside former life are difficult to be find than now is taking seriously which one would work to believe or which one the resource are convinced. If you find the unstable resource then you buy it as your main information there will be huge disadvantage for you. All of those possibilities will not happen throughout you if you take The Skull of Australopithecus afarensis (Series in Human Evolution) as your daily resource information.

Jeffrey Evans:

Often the book The Skull of Australopithecus afarensis (Series in Human Evolution) has a lot associated with on it. So when you check out this book you can get a lot of profit. The book was compiled by the very famous author. Tom makes some research ahead of write this book. This particular book very easy to read you can find the point easily after scanning this book.

Avis Marguez:

That book can make you to feel relax. That book The Skull of Australopithecus afarensis (Series in Human Evolution) was colorful and of course has pictures on the website. As we know that book The Skull of Australopithecus afarensis (Series in Human Evolution) has many kinds or genre. Start from kids until adolescents. For example Naruto or Private eye Conan you can read and believe you are the character on there. Therefore , not all of book are make you bored, any it makes you feel happy, fun and unwind. Try to choose the best book in your case and try to like reading this.

Elizabeth Smith:

As a student exactly feel bored in order to reading. If their teacher inquired them to go to the library in order to make summary for some reserve, they are complained. Just very little students that has reading's internal or real their interest. They just do what the trainer want, like asked to go to the library. They go to presently there but nothing reading really. Any students feel that examining is not important, boring in addition to can't see colorful images on there. Yeah, it is to be complicated. Book is very important to suit your needs. As we know that on this period of time, many ways to get whatever we want. Likewise word says, many ways to reach Chinese's country. Therefore this The Skull of Australopithecus afarensis (Series in Human Evolution) can make you sense more interested to read.
