Green By Design: Creating a Home for Sustainable Living

Angela M. Dean

Green By Design: Creating a Home for Sustainable Living Angela M. Dean

There is no "one-size-fits-all" plan for so-called "green" homes; rather, there are universal principles of design that can be applied to individual tastes and needs. Architect Angela Dean offers a variety of ways to incorporate green building into your home, including using healthy building materials such as straw bales and natural flooring, taking advantage of local materials and resources, reusing gray water for landscaping, and incorporating passive solar design. Her goal is to teach people how to think about building sustainable homes. Green by Design provides a thorough analysis of what it means to build green and offers advice on what to consider when designing a sustainable home. Green by Design features full-color photographs and line drawings of floor plans show different examples of successful sustainable homes. It also includes in-depth case studies of more than a dozen homes so readers planning a green home can see what worked for others. By providing people with knowledge, inspiration, and the ability to ask the right questions (and understand the answers) Green by Design puts home builders and owners on a path to creating beautiful, environmentally responsible homes that they can be proud to live in. Angela Dean, AIA, is principal architect of AMD Architecture in Salt Lake City. She specializes in environmentally responsible designs to create healthy, comfortable buildings that are in harmony with the environment

From reader reviews:

Gale Kizer:

In this 21st one hundred year, people become competitive in most way. By being competitive currently, people have do something to make all of them survives, being in the middle of often the crowded place and notice through surrounding. One thing that often many people have underestimated the item for a while is reading. Yeah, by reading a book your ability to survive boost then having chance to stay than other is high. For you who want to start reading any book, we give you this particular Green By Design: Creating a Home for Sustainable Living book as starter and daily reading book. Why, because this book is greater than just a book.

Linda Brown:

Nowadays reading books be than want or need but also turn into a life style. This reading routine give you lot of advantages. The huge benefits you got of course the knowledge even the information inside the book this improve your knowledge and information. The data you get based on what kind of e-book you read, if you want have more knowledge just go with knowledge books but if you want experience happy read one using theme for entertaining including comic or novel. The particular Green By Design: Creating a Home for Sustainable Living is kind of e-book which is giving the reader capricious experience.

Earnest Koontz:

Reading a book tends to be new life style in this era globalization. With studying you can get a lot of information that could give you benefit in your life. Together with book everyone in this world can certainly share their idea. Guides can also inspire a lot of people. A great deal of author can inspire all their reader with their story or perhaps their experience. Not only situation that share in the guides. But also they write about the information about something that you need example of this. How to get the good score toefl, or how to teach your children, there are many kinds of book which exist now. The authors on earth always try to improve their expertise in writing, they also doing some research before they write to the book. One of them is this Green By Design: Creating a Home for Sustainable Living.

Jere Bingham:

People live in this new time of lifestyle always make an effort to and must have the free time or they will get wide range of stress from both everyday life and work. So , when we ask do people have extra time, we will say absolutely yes. People is human not only a robot. Then we ask again, what kind of activity do you have when the spare time coming to anyone of course your answer will unlimited right. Then do you ever try this one, reading books. It can be your alternative in spending your spare time, the actual book you have read is actually Green By Design: Creating a Home for Sustainable Living.
