*John H. Miller, Scott E. Page*

**Complex Adaptive Systems: An Introduction to Computational Models of Social Life (Princeton Studies in Complexity)** John H. Miller, Scott E. Page

This book provides the first clear, comprehensive, and accessible account of complex adaptive social systems, by two of the field's leading authorities. Such systems--whether political parties, stock markets, or ant colonies--present some of the most intriguing theoretical and practical challenges confronting the social sciences. Engagingly written, and balancing technical detail with intuitive explanations, *Complex Adaptive Systems* focuses on the key tools and ideas that have emerged in the field since the mid-1990s, as well as the techniques needed to investigate such systems. It provides a detailed introduction to concepts such as emergence, self-organized criticality, automata, networks, diversity, adaptation, and feedback. It also demonstrates how complex adaptive systems can be explored using methods ranging from mathematics to computational models of adaptive agents.

John Miller and Scott Page show how to combine ideas from economics, political science, biology, physics, and computer science to illuminate topics in organization, adaptation, decentralization, and robustness. They also demonstrate how the usual extremes used in modeling can be fruitfully transcended.

**From reader reviews:**

**Joseph Anderson:**

What do you in relation to book? It is not important along with you? Or just adding material when you really need something to explain what yours problem? How about your free time? Or are you busy person? If you don't have spare time to accomplish others business, it is give you a sense of feeling bored faster. And you have free time? What did you do? Every individual has many questions above. They need to answer that question due to the fact just their can do which. It said that about e-book. Book is familiar in each person. Yes, it is suitable. Because start from on kindergarten until university need this kind of Complex Adaptive Systems: An Introduction to Computational Models of Social Life (Princeton Studies in Complexity) to read.

**Nancy Hunt:**

The experience that you get from Complex Adaptive Systems: An Introduction to Computational Models of Social Life (Princeton Studies in Complexity) is a more deep you searching the information that hide into the words the more you get enthusiastic about reading it. It does not mean that this book is hard to comprehend but Complex Adaptive Systems: An Introduction to Computational Models of Social Life (Princeton Studies in Complexity) giving you buzz feeling of reading. The article author conveys their point in specific way that can be understood by simply anyone who read the idea because the author of this guide is well-known enough. This book also makes your own personal vocabulary increase well. That makes it easy to understand then can go along, both in printed or e-book style are available. We propose you for having this Complex Adaptive Systems: An Introduction to Computational Models of Social Life (Princeton Studies in Complexity) instantly.

**Kendrick Hardee:**

This Complex Adaptive Systems: An Introduction to Computational Models of Social Life (Princeton Studies in Complexity) is great e-book for you because the content that is full of information for you who all always deal with world and get to make decision every minute. This book reveal it data accurately using great organize word or we can point out no rambling sentences in it. So if you are read the idea hurriedly you can have whole information in it. Doesn't mean it only offers you straight forward sentences but hard core information with beautiful delivering sentences. Having Complex Adaptive Systems: An Introduction to Computational Models of Social Life (Princeton Studies in Complexity) in your hand like getting the world in your arm, information in it is not ridiculous a single. We can say that no book that offer you world within ten or fifteen small right but this guide already do that. So , this is certainly good reading book. Hey there Mr. and Mrs. busy do you still doubt that will?

**Tara Cassell:**

Is it you actually who having spare time in that case spend it whole day simply by watching television programs or just resting on the bed? Do you need something totally new? This Complex Adaptive Systems:

An Introduction to Computational Models of Social Life (Princeton Studies in Complexity) can be the respond to, oh how comes? A book you know. You are thus out of date, spending your time by reading in this brand new era is common not a geek activity. So what these guides have than the others?
