**God Made Organics, NOT GMOs: ...sooo, WTF is In Our Food?** Karen Anne vanBarneveld-Price

My book is about the state of our food supply and how the evolution of farming practices, pesticides, and genetic tampering with seeds directly relates to our health and that of our planet. The journey begins over seventy years ago to when our food nourished us, to today when it does not.

This is my unwavering message to the readers that our bodies are not designed to eat food that has been altered by science. Whether you have food sensitivities or not, avoiding processed and GMO foods should be a priority. We can't wait for legislation. We must begin to act in our own self interest.
