## Orthopaedic Issues in Osteoporosis

Orthopaedic procedures in elderly patients are challenging and costly. As the population ages these costs will continue to escalate. ORTHOPAEDIC ISSUES IN OSTEOPOROSIS weaves together theory and applications to provide the first reference available on the orthopaedic aspects of osteoporosis.

The focus on the management of patients who have had a fracture sets this book apart. Featuring extensive coverage of surgical management of osteoporotic fractures, it highlights the challenges of internal repair in osteoporotic bone. The chapters combine the basic and clinical essentials of osteoporosis with the latest orthopaedic findings in applied research and surgical treatment.

Fractures associated with osteoporosis account for the majority of the money spent on this condition. However, the orthopaedic treatment of osteoporotic bone is a formidable surgical problem, and one not covered explicitly in any book - until now. With over 300 tables, line drawings, equations, and macro or X-ray photographs, ORTHOPAEDIC ISSUES IN OSTEOPOROSIS is a long overdue resource.

About the Editor: Yuehuei H. (Huey) An, MD, graduated from the Harbin Medical University, Harbin, Northeast China in 1983 and was trained in orthopaedic surgery at the Beijing Ji Shui Tan Hospital (Residency), and in hand surgery at Sydney Hospital (Clinical Fellow), Australia. In 1991, Dr. An joined with Dr. Richard J. Friedman in the Department of Orthopaedic Surgery at the Medical University of South Carolina to establish the MUSC Orthopaedic Research Laboratory, which is now a multifunctional orthopaedic research center. Dr. An has published more than 100 scientific papers and book chapters and more than 100 abstracts and edited 6 books, including *Animal Models in Orthopaedic Research* (CRC Press 1999) and *Mechanical Testing of Bone and the Bone-Implant Interface* (CRC Press 2000). He is an active member of eight academic societies in the fields of orthopaedics, biomaterials, biomechanics, and tissue engineering.
