If you can only read and reference one green thing, make it this book: an easily comprehensible, clearly presented source for green living and conservation. Everything you need to know is right here at your fingertips. Unlike a lot of other overwhelming environmental guides on the market, this is green decision making in bite sized pieces. With chose it/lose it comparisons throughout, now it's simple to figure out it's worth switching to a green detergent, what kind of plastic your sports bottle is made of, or which fish is safest to eat. Rather than spending time trying to *figure out* how best to conserve, recycle, and protect the environment, use this book and devote that time to *making* the difference.
