The fundamental objective of the book is to prepare you for the PMP exam. The book is based partly on PMBOK, which is the primary reference for the PMP exam. Additionally, we provide custom tailored preparation material for your preparation as part of this book. Besides the stated material, we have developed our own question bank that consists of 650+ PMP style questions and includes questions on simulation, calculations, logical thinking, exceptions and reasoning, professional responsibility, and many more! The book content is shaped around the nine knowledge areas, as is the PMBOK Guide 2005 edition (3rd edition). The book material is interspersed with the five process groups. As the book material is taught, it is anticipated that you will share your experiences with reference to the concepts being addressed. A final simulated exam is used to evaluate the level of preparedness of you for the PMP exam. You are expected to devote the time and energy required to obtain the score suggested by the book requirements. At the end of each knowledge area, you will be expected to take the required exam questions.
