Robert Love

Linux System Programming: Talking Directly to the Kernel and C Library Robert Love

Write software that draws directly on services offered by the Linux kernel and core system libraries. With this comprehensive book, Linux kernel contributor Robert Love provides you with a tutorial on Linux system programming, a reference manual on Linux system calls, and an insider's guide to writing smarter, faster code.

Love clearly distinguishes between POSIX standard functions and special services offered only by Linux. With a new chapter on multithreading, this updated and expanded edition provides an in-depth look at Linux from both a theoretical and applied perspective over a wide range of programming topics, including:

- A Linux kernel, C library, and C compiler overview
- Basic I/O operations, such as reading from and writing to files
- Advanced I/O interfaces, memory mappings, and optimization techniques
- The family of system calls for basic process management
- Advanced process management, including real-time processes
- Thread concepts, multithreaded programming, and Pthreads
- File and directory management
- Interfaces for allocating memory and optimizing memory access
- Basic and advanced signal interfaces, and their role on the system
- Clock management, including POSIX clocks and high-resolution timers

From reader reviews:

Athena Thornton:

Book is to be different for every single grade. Book for children right up until adult are different content. We all know that that book is very important for all of us. The book Linux System Programming: Talking Directly to the Kernel and C Library seemed to be making you to know about other know-how and of course you can take more information. It doesn't matter what advantages for you. The e-book Linux System Programming: Talking Directly to the Kernel and C Library is not only giving you more new information but also to be your friend when you truly feel bored. You can spend your own spend time to read your reserve. Try to make relationship with all the book Linux System Programming: Talking Directly to the Kernel and C Library. You never experience lose out for everything in the event you read some books.

Dana Register:

This Linux System Programming: Talking Directly to the Kernel and C Library is great book for you because the content which is full of information for you who else always deal with world and get to make decision every minute. This kind of book reveal it information accurately using great plan word or we can declare no rambling sentences inside it. So if you are read this hurriedly you can have whole facts in it. Doesn't mean it only provides straight forward sentences but challenging core information with splendid delivering sentences. Having Linux System Programming: Talking Directly to the Kernel and C Library in your hand like having the world in your arm, info in it is not ridiculous a single. We can say that no publication that offer you world in ten or fifteen small right but this publication already do that. So , this can be good reading book. Hello Mr. and Mrs. busy do you still doubt in which?

William Burmeister:

You may spend your free time to learn this book this e-book. This Linux System Programming: Talking Directly to the Kernel and C Library is simple to create you can read it in the area, in the beach, train along with soon. If you did not include much space to bring the particular printed book, you can buy the particular e-book. It is make you better to read it. You can save often the book in your smart phone. Consequently there are a lot of benefits that you will get when one buys this book.

Dorcas Rogers:

Don't be worry when you are afraid that this book may filled the space in your house, you will get it in e-book approach, more simple and reachable. This specific Linux System Programming: Talking Directly to the Kernel and C Library can give you a lot of buddies because by you looking at this one book you have thing that they don't and make a person more like an interesting person. That book can be one of one step for you to get success. This reserve offer you information that might be your friend doesn't know, by knowing more than various other make you to be great people. So , why hesitate? We need to have Linux System Programming: Talking Directly to the Kernel and C Library.
