Mind and Reality : The Space-Time Window

Wolfram Schommers

Mind and Reality : The Space-Time Window Wolfram Schommers

The relationship between mind and reality is usually perceived as an event that takes place in reality and producing simultaneously an internal image in the mind. So it takes place twice, so to speak, and there is a one-to-one correspondence between the two events. Within this conception, matter is embedded in space and time, and can be designated as “container-principle”. This monograph emphasizes that the well-known philosopher Immanuel Kant denied this principle and he stated that reality is principally not recognizable to a human being, and modern biological evolution seems to lead exactly to Kant's point of view. Within the theory of evolution, man's image about reality in mind does not have to be complete and true in the sense of a precise reproduction, and it is relatively easy to recognize that even space and time should not be elements of reality outside. Within this conception, only a certain part of reality, which the human being needs for mastering life, is projected onto space and time, and we come to the so-called “projection principle”. Then, spacetime defines the window to reality, leading to a number of exciting and essential questions, some of which are discussed in this monograph.

As is known, current physics is mainly based on the container-principle. But this monograph proposes that the projection principle is obviously more suitable and could help to solve open-ended questions as, for example, in connection with the nature of time, the particle-wave duality, the cosmological constant, etc. Regarding the statistical behavior of matter, Einstein's statement “God does not play dice” has to be seen in a new light, but also Feynman's general viewpoint on quantum theory that it cannot be understood by man. However, conventional quantum theory is obviously not a consistent framework as per the projection principle. The term “world equation” is critically probed in this monograph.

Contents:

- Basic Questions
- The Impact of Evolution
- Other Observers
- Specific Space-Time Phenomena
- **Appendices:**
 - The Nature of Our Direct Impressions
 - Basic Features of Space and Time
 - Cosmological Constant
 - Kant's Philosophy
 - Theory of Science: Basic Statements
 - Basic Elements of Projection Theory

Readership: Students, researchers and academics interested in quantum physics and evolutionary biology.

Key Features:

The discussion has been done at the basic level

From reader reviews:

Robert Brown: Have you spare time for a day? What do you do when you have a lot more or little spare time? Yes, you can choose the suitable activity for spend your time. Any person spent all their spare time to take a move, shopping, or went to the Mall. How about open or even read a book called Mind and Reality : The Space-Time Window? Maybe it is to become best activity for you. You recognize beside you can spend your time along with your favorite's book, you can cleverer than before. Do you agree with their opinion or you have additional opinion?

Theodore Stewart: The actual book Mind and Reality : The Space-Time Window has a lot details on it. So when you check out this book you can get a lot of profit. The book was compiled by the very famous author. The author makes some research before write this book. This kind of book very easy to read you will get the point easily after scanning this book.

Earl Quintana: This Mind and Reality : The Space-Time Window is great e-book for you because the content which is full of information for you who all always deal with world and get to make decision every minute. This particular book reveal it information accurately using great coordinate word or we can point out no rambling sentences inside. So if you are read it hurriedly you can have whole facts in it. Doesn't mean it only provides straight forward sentences but tricky core information with attractive delivering sentences. Having Mind and Reality : The Space-Time Window in your hand like getting the world in your arm, facts in it is not ridiculous 1. We can say that no publication that offer you world in ten or fifteen small right but this book already do that. So , this is certainly good reading book. Hey there Mr. and Mrs. active do you still doubt which?

Keri Lo: You can obtain this Mind and Reality : The Space-Time Window by check out the bookstore or Mall. Merely viewing or reviewing it can to be your solve issue if you get difficulties for the knowledge. Kinds of this guide are various. Not only through written or printed but additionally can you enjoy this book through e-book. In the modern era just like now, you just looking of your mobile phone and searching what their problem. Right now, choose your current ways to get more information about your e-book. It is most important to arrange you to ultimately make your knowledge are still update. Let's try to choose suitable ways for you.
