As an addition to the European postgraduate training system for young neurosurgeons we began to publish in 1974 this series devoted to Advances and Technical Standards in Neurosurgery which was later sponsored by the European Association of Neurosurgical Societies. The fact that the English language is well on the way to becoming the international medium at European scientific conferences is a great asset in terms of mutual understanding. Therefore we have decided to publish all contributions in English, regardless of the native language of the authors. All contributions are submitted to the entire editorial board before publication of any volume. Our series is not intended to compete with the publications of original scientific papers in other neurosurgical journals. Our intention is, rather, to present fields of neurosurgery and related areas in which important recent advances have been made. The contributions are written by specialists in the given fields and constitute the first part of each volume. In the second part of each volume, we publish detailed descriptions Of standard operative procedures, furnished by experienced clinicians; in these articles the authors describe the techniques they employ and explain the advantages, difficulties and risks involved in the various procedures. This part is intended primarily to assist young neurosurgeons in their post graduate training. However, we are convinced that it will also be useful to experienced, fully trained neurosurgeons.

**From reader reviews:**

**Katrina White:**

The book *Advances and Technical Standards in Neurosurgery* has a lot associated with on it. So when you make sure to read this book you can get a lot of gain. The book was authored by the very famous author. This articles author makes some research before write this book. That book very easy to read you will get the point easily after reading this article book.

**Amy Gutierrez:**

Playing with family inside a park, coming to see the sea world or hanging out with friends is thing that usually you could have done when you have spare time, subsequently why you don't try issue that really opposite from that. A single activity that make you not sensation tired but still relaxing, trilling like on roller coaster you have been ride on and with addition of information. Even you love *Advances and Technical Standards in Neurosurgery*, you can enjoy both. It is very good combination right, you still desire to miss it? What kind of hang type is it? Oh can happen its mind hangout people. What? Still don't buy it, oh come on its referred to as reading friends.

**Steven Burley:**

Is it you actually who having spare time after that spend it whole day simply by watching television programs or just laying on the bed? Do you need something totally new? This *Advances and Technical Standards in Neurosurgery* can be the response, oh how comes? A book you know. You are consequently out of date, spending your extra time by reading in this brand new era is common not a nerd activity. So what these publications have than the others?

**Mark Adair:**

What is your hobby? Have you heard which question when you got students? We believe that that query was given by teacher for their students. Many kinds of hobby, Everybody has different hobby. And you know that little person like reading or as reading through become their hobby. You have to know that reading is very important along with book as to be the thing. Book is important thing to provide you knowledge, except your personal teacher or lecturer. You see good news or update in relation to something by book. Numerous books that can you choose to adopt be your object. One of them are these claims *Advances and Technical Standards in Neurosurgery*.
