## The Mathematics of Marriage: Dynamic Nonlinear Models (MIT Press) John M. Gottman

Divorce rates are at an all-time high. But without a theoretical understanding of the processes related to marital stability and dissolution, it is difficult to design and evaluate new marriage interventions. *The Mathematics of Marriage* provides the foundation for a scientific theory of marital relations. The book does not rely on metaphors, but develops and applies a mathematical model using difference equations. The work is the fulfillment of the goal to build a mathematical framework for the general system theory of families first suggested by Ludwig Von Bertalanffy in the 1960s. The book also presents a complete introduction to the mathematics involved in theory building and testing, and details the development of experiments and models. In one "marriage experiment," for example, the authors explored the effects of lowering or raising a couple's heart rates. Armed with their mathematical model, they were able to do real experiments to determine which processes were affected by their interventions. Applying ideas such as phase space, null clines, influence functions, inertia, and uninfluenced and influenced stable steady states (attractors), the authors show how other researchers can use the methods to weigh their own data with positive and negative weights. While the focus is on modeling marriage, the techniques can be applied to other types of psychological phenomena as well.

### **From reader reviews:**

#### **William Coker:**

The ability that you get from The Mathematics of Marriage: Dynamic Nonlinear Models (MIT Press) will be the more deep you searching the information that hide inside the words the more you get enthusiastic about reading it. It doesn't mean that this book is hard to be aware of but The Mathematics of Marriage: Dynamic Nonlinear Models (MIT Press) giving you joy feeling of reading. The author conveys their point in selected way that can be understood simply by anyone who read this because the author of this e-book is well-known enough. This specific book also makes your own personal vocabulary increase well. That makes it easy to understand then can go with you, both in printed or e-book style are available. We propose you for having this specific The Mathematics of Marriage: Dynamic Nonlinear Models (MIT Press) instantly.

#### **Frank Bullard:**

The actual book The Mathematics of Marriage: Dynamic Nonlinear Models (MIT Press) will bring you to the new experience of reading a book. The author style to spell out the idea is very unique. Should you try to find new book to learn, this book very ideal to you. The book The Mathematics of Marriage: Dynamic Nonlinear Models (MIT Press) is much recommended to you to study. You can also get the e-book in the official web site, so you can quickly to read the book.

#### **Helen Williams:**

In this period of time globalization it is important to someone to receive information. The information will make you to definitely understand the condition of the world. The health of the world makes the information much easier to share. You can find a lot of sources to get information example: internet, classifieds, book, and soon. You can view that now, a lot of publisher in which print many kinds of book. The book that recommended to you personally is The Mathematics of Marriage: Dynamic Nonlinear Models (MIT Press) this book consist a lot of the information with the condition of this world now. This particular book was represented so why is the world has grown up. The dialect styles that writer make usage of to explain it is easy to understand. The particular writer made some investigation when he makes this book. Honestly, that is why this book ideal all of you.

#### **Shari Villa:**

In this particular era which is the greater particular person or who has ability in doing something more are more treasured than other. Do you want to become considered one of it? It is just simple way to have that. What you should do is just spending your time almost no but quite enough to enjoy a look at some books. Among the books in the top list in your reading list is definitely The Mathematics of Marriage: Dynamic Nonlinear Models (MIT Press). This book and that is qualified as The Hungry Hills can get you closer in getting precious person. By looking upward and review this reserve you can get many advantages.
